Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Choi (US 5,155,925).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Choi in view of Levin et al. (US 4,800,654). Choi is considered to disclose the claimed invention, as rejected above, except for the claimed fuel cell supplies not only the blower but also an electronic control unit, and selectively other electric components as well with electrical energy. Levin, another hot air generation flow device, is considered to disclose a fuel cell supplies not only the blower but also an electronic control unit, and selectively other electric components as well with electrical energy at column 4 line 47 through column 5 line 15. It would have been obvious to one skilled in the art to combine the teachings of Choi with the fuel cell supplies not only the blower but also an electronic control unit, and selectively other electric components as well with electrical energy, considered disclosed in Levin, for the purpose of supplying power to components.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Choi in view of Chang et al. (US 2003/0150126). Choi is considered to disclose the claimed invention, as rejected above, except for the claimed transparent material viewing port. Chang, another hot air generation flow device, is considered to disclose a transparent material viewing port at published paragraph [0037]. It would have been obvious to one skilled in the art to combine the teachings of Choi with the transparent material viewing port, considered disclosed in Chang, for the purpose permitting a user to determine an amount of substance remaining.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).
